- Troubleshoot problems and make informed decisions during response
- Perform inspections, preventative and corrective maintenance, cleaning and repair as needed to keep LSS equipment in excellent working condition and appearance
- Maintain complete and accurate records and enter into database
- General custodial duties such as cleaning floors, surfaces, laundry, restock consumables, collect and dispose of trash and recycling
- Keep a supply and inventory of common supplies and replacement parts
- Follow and maintain all safety policies and procedures
- Routine cleaning of life support areas to provide a safe work environment
- Mix the salt water
- Perform checks and calibration of lab equipment
- Perform and record basic water quality testing, ensure appropriate collection and handling of samples
- Conduct system maintenance such as vacuuming, backwashing, filter maintenance, cleaning acrylic, scrubbing decor, cleaning filter materials and water changes
- Provide adequate written and verbal communications across shifts
- Work closely with the team and support the work of the Curation department to keep the animal collection healthy and safe
- Observe animal behavior and report abnormalities
- Required to carry the facility's cell phones and respond when working as the dedicated onsite employee

- Required to stay within the building while on shift and during breaks when working as the dedicated onsite employee

Position Preferences:

- Organized and self-motivated working effectively with limited supervision
- Ability to learn quickly through hands-on experience
- Knowledge of life support system equipment such as pumps, filters, fractionators, UV sterilizers, heaters, ozone systems, control equipment, lighting controls, generators, plumbing and electrical is preferred
- Animal husbandry experience is preferred
